

Speed - Calming Flasher

From Mikros Systems now available:
The Speed - Calming Flasher

A highly effective speed-calming device. Where implemented dramatic results have been recorded with its effectiveness in reducing over-speeding.

Application

The Speed Flasher is used in conjunction with a Mikros Systems RAKTEL traffic data logger.

The Speed-Calming Flasher is mounted on a pole down stream from the traffic monitoring station and is triggered by over-speeding vehicles.

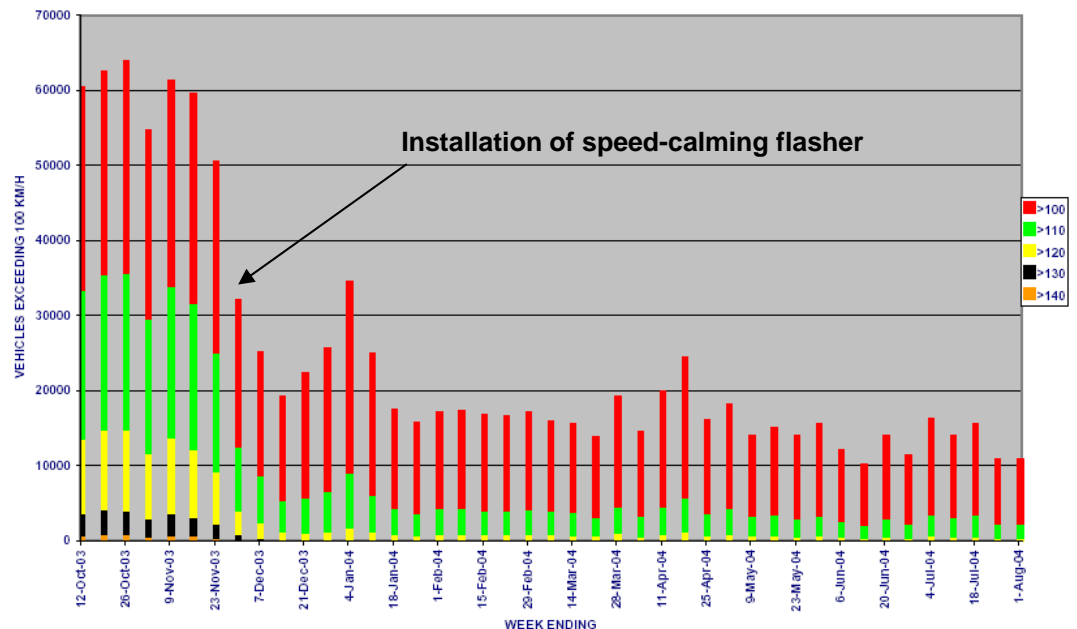

Features

- Affordable speed-calming measure.
- Flash rate 1 per 2 seconds.
- Automatic day/night setting.
- Differential speed limit selection for light and heavy vehicles.
- Detailed vehicle information recorded.
- Remotely configurable.
- Up to six flashers per logger.
- Multiple lanes per flasher selectable.

Immediate results

Immediately after installing the Mikros Systems Speed-Calming Flasher the effects are dramatically visible as shown in the following chart. Here over-speeding dropped by a staggering 80%.
