TMH3

Traffic Monitoring Service Provision

Do you want to become a TMH3 accredited traffic counting and monitoring Service Provider?

What is TMH3?

The Technical Methods for Highways (TMH) is a series of standard specification documents drawn up by COTO (South African Committee of Transport Officials). TMH3 deals with Traffic and Weigh-in-Motion Monitoring Specifications.

What is in it for me?

- Improve your quality of service.
- Qualify for SANRAL and other Authorities' Traffic Monitoring tenders.

Why the need for accreditation?

It has now become a statutory requirement that relevant traffic information be collected on a regular basis by Authorities to ensure funding as required by the Division of Revenue Act.

Who are we?

Mikros Systems is a TMH3 accredited Traffic Monitoring **Systems Supplier** with over 40 years of local and international experience. We would like to share our expertise with you!

What do we offer?

- Get you certified as a TMH3 Traffic Monitoring **Service Provider**
- Set you up with a complete Traffic Data Quality Assurance system
- Supply you with TMH3 certified equipment
- Support you with comprehensive data management software
- Provide you with detailed installation procedures
- Always have online support at hand
- Provide continued training

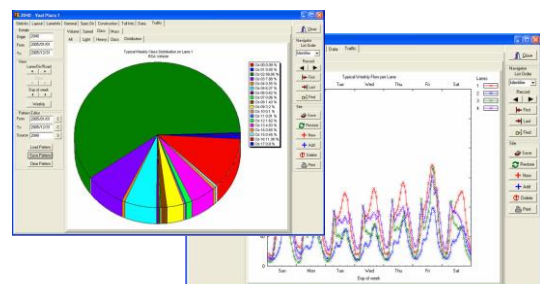

Is this a one size fits all?

Definitely not; we cater for start-ups and seasoned contractors.

Is this a franchise model?

Yes it is, like with all franchises you are required to deliver in accordance to a strict set of rules. You will be supported by us, the System Supplier, with a complete set of tools and procedures to successfully provide TMH3 certified Traffic Monitoring Service.

What are you waiting for?

Get in contact with us and allow us to evaluate you, recommend and propose a bespoke model for your operation:
